The CIO VISIONS Leadership Summit is a unique invitation-only event that has been bringing together over 300 senior-level executives from mid-market and enterprise level companies. Using a unique model of targeted one-on-one research meetings with leading solution providers, paired with an 100% peer driven educational program addressing the latest trends, challenges and opportunities, CIO VISIONS is the best way to network with top leaders to exchange ideas, discuss strategy and debate the most pressing industry challenges.

**KEY THEMES:**

**CYBERSECURITY**
Protecting yourself and your company are always top priority. Cover a wide breadth of cyber security initiatives including protocol, network and data protection, operational integration, balancing visibility needs and much more. Minimize the possibility of breaches using AI and learn how to plan for the worst to minimally impact business continuity.

**CIO LEADERSHIP AND INNOVATION**
Taking the lead in today’s organization is crucial for the CIO. With the ever-changing environment of new technologies, shifts in strategies and expanding technical needs, the expectations of being an IT leader are very different from 5 years ago. Learn from qualified professionals on how to transform and lead your team to success in this modern age.

**DATA MANAGEMENT: STRATEGY FOR STORAGE AND ANALYTICS**
Data is abundant, and this is where you learn how keep it clean and make it profitable. Review analytics platforms, apply machine learning and assess other techniques for locating and sifting through your gold mine.

**DevOps STRATEGY**
When everything needs to be done yesterday, and even when it doesn’t, operational strategy can make or break the future success of your applications and technology. Learn top practices, emerging trends, discuss old ones like Agile, and stay on the bleeding edge of technology to accelerate your push forwards without breaking the bank, or the backend.

**DIGITAL TRANSFORMATION**
The data produced by our digital systems and processes borders on overwhelming. In this track we will discuss the best practices for IT Leaders to set up their organizations for success during their digital transformation and how to identify the data that matters most.

**ARTIFICIAL INTELLIGENCE**
Explore strategies for leveraging the artificial intelligence to drive down costs and the security implications that come with it. Dive deeper to understand the impact on employees, mobile strategy and more.

**STAFF TRAINING AND RETENTION**
Navigating between technology initiatives and managing your staff can be profoundly challenging. The sharp learning curve detracts from communication, understanding of progress, strategy acceptance and appropriate resource allocation. Blow past these challenges to keep your company ticking upwards while keeping everyone onboard.

**TARGET AUDIENCE:** Senior-level IT Executives (C-Level, SVP, VP, Director)
