

The CISO VISIONS Cybersecurity Summit is a unique invitation-only event that has been bringing together over 300 senior-level executives from mid-market and enterprise level companies. Using a unique model of targeted one-on-one research meetings with leading solution providers, paired with an 100% peer driven educational program addressing the latest trends, challenges and opportunities, CISO VISIONS is the best way to network with top leaders to exchange ideas, discuss strategy and debate the most pressing industry challenges.

KEY THEMES:

NETWORK SECURITY

The importance of network security is at an all-time high for businesses and consumers alike. Examine, debate and discuss organizational strategies of how to keep your network safe in today's current environment.

CLOUD STRATEGY

Explore strategies for leveraging the cloud to drive down costs and the security implications that come with it. Dive deeper to understand the impact on employees, mobile strategy and more.

ENDPOINT PROTECTION

When dealing with multiple interconnections within your computer networks, what can you do to stay secure? Learn more about endpoint protection/ security and why it should be a critical part of developing your cybersecurity strategy.

IDENTITY ACCESS MANAGEMENT

Hear the latest recommendations and research about IAM from your peers. Learn about the latest trends in security and how to optimize your IAM processes to maximize results.

CYBERSECURITY STAFF TRAINING

Navigating between technology initiatives and managing your staff can be profoundly challenging. The sharp learning curve detracts from communication, understanding of progress, strategy acceptance and appropriate resource allocation. Blow past these challenges to keep your company ticking upwards while keeping everyone on board.

RANSOMWARE/PHISHING

Exchange ideas and views while learning the latest trends on how to protect your business from ransomware and phishing scams.

MACHINE LEARNING

Stay ahead of the curve and get the latest information on machine learning. Consult and learn from experienced executives about the latest technologies and advancements on how to accelerate your progress, avoid pitfalls and overcome roadblocks.

DIGITAL TRANSFORMATION

The data produced by our digital systems and processes borders on overwhelming. In this track, we will discuss the best practices for IT Leaders to set up their organizations for success during their digital transformation and how to identify the data that matters most.

TARGET AUDIENCE

Senior-level IT Executives (C-Level, SVP, VP, Director)
